

PEOPLE PROFILES
JIM WALLACE
SENIOR PROJECT MANAGER

Jim has gained vast experience in healthcare project management, with almost 20 years of working on healthcare projects throughout the UK, all with McLaughlin & Harvey. This has included delivering critical care facilities in London, which included an innovative progressive slide of the building's new steelwork structure over a live theatre suite below. This allowed for the buildings structure to be assembled without the need for working directly over the theatres whilst operations were in progress. Jim has also delivered a local Hospice in Scotland, a project that helped bring comfort to those that need it most at the most trying of times.

"As well as the personal rewards and satisfaction of working in the healthcare sector, there is also a great sense of pride when I'm able to see the look on the face of the clinicians and end users. Knowing that I have helped to create a space that will ultimately aid the recovery and recuperation of individuals is immensely rewarding."
