

November 2015

Welcome to the sixth quarterly edition of the McLaughlin & Harvey Newsletter. As a major building and civil engineering contractor operating throughout Great Britain and Ireland, we wish to inform you of our current business activities. We believe our business is all about relationships. We want to continue building our relationship with you by keeping you informed of what we are up to. We also welcome your feedback and comments.

Please keep in contact with us through [LinkedIn](#) and [Twitter](#), and view us on [YouTube](#).

World record success!

McLaughlin & Harvey in conjunction with Queen's University Belfast are world record holders.

McLaughlin & Harvey has worked with students from Queen's University Belfast to create the biggest Meccano structure in the world, as affirmed by the Guinness World Records.

We provided free technical advice and resources to turn the theoretical design into a practical construction methodology. Following a successful

trial erection at our Mallusk head office, the Meccano bridge was erected and unveiled to the public at Belfast's Clarendon Dock.

Following delivery to site we worked with the students to assemble the bridge components on land. It was then lifted into position over the dock in a highly complicated crane lift, before being unveiled to the public and confirmed by Guinness as a world record breaker.
